

7(a) Key messages of TEC to the COP

Draft key messages on innovation

Technology Executive Committee, 15th meeting
Bonn, Germany, 12–15 September 2017

TEC 2016-2018 workplan

- TEC 14 requested task force to, inter alia: *Prepare draft TEC Brief and draft recommendations to COP 23 on innovation*
- Task force prepared draft recommendations: TEC/2017/15/16.2

Recommendation 1

Encourages national and international actors to consider prioritizing resources (human, organizational, financial), in accordance with their needs, priorities, and capacities, for scaling-up and speeding-up technological innovation for implementing NDCs, NAPs and mid-century strategies

Recommendation 2

Encourages countries to consider enhancing public and private participation in the RD&D of climate technologies that may support the implementation of NDCs, NAPs, and mid-century strategies by increasing public expenditure for such RD&D and providing a clear policy signal of a long-term national commitment to act on climate change

Recommendation 3

Encourages countries to create favorable conditions for the widespread use of climate technologies by developing supportive policy environments, facilitating market creation and expansion, and promoting capacity-building

Recommendation 4

Encourages countries to enhance existing and build new collaborative initiatives on climate technology innovation which may support NDC, NAP and mid-century strategy implementation, including for technology development and transfer and the sharing of expertise, good practices and lessons learned

Recommendation 5

Encourages the TEC, CTCN, SCF, GEF and GCF to collaborate in identifying effective policies, instruments and collaboration forms that support developing countries and international partners to enhance their technological innovation efforts for achieving the Paris Agreement's objectives

Recommendation 6

Invites the Green Climate Fund to share information in its annual report on projects it approved that support the innovation and scaling-up of climate technologies, with the aim of informing the Technology Mechanism as it undertakes further work on climate technology innovation.

The TEC will be invited to agree on its key messages to COP 23, to be part of its 2017 annual report.

Thank you!
