

# Outcomes of break out groups - Adaptation

Technology Executive Committee, 15<sup>th</sup> meeting  
Bonn, Germany, 12-15 September 2016

## 1. Draft compilation SSC good practices on knowledge sharing and practical learning

The break out group suggests to include the following:

- In “Trends”: different ways and different level of matchmaking under SSC/TrC is being done
- In “Lessons learned”: potential pitfalls and failures to watch for
- In “Recommendation”:
  - systematic approach on how technology and knowledge is shared under SSC/TrC;
  - factors that could enhance sustainability of the projects: self-empowerment and opportunities of engaging private sector and research institutions
- Contact points of projects

## **2. Potential work of SSC in 2018 (joint work with TF Mitigation):**

The break out group also brainstormed ideas for SSC work next year:

- How SSC can help synergize mitigation and adaptation actions
- How SSC practice can be mainstreamed within country
- Map out SSC programmes/fund and other multilateral institutions in support of SSC
- Others?

*Thank you!*
