## Challenges and lessons learnt

---

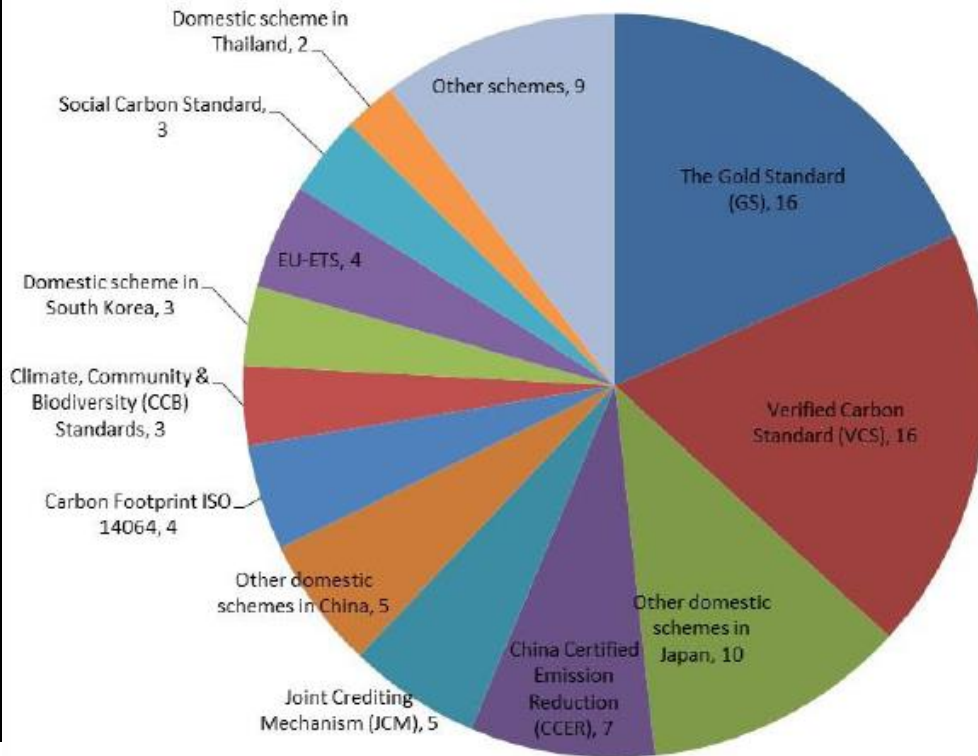

25 DOEs reported on challenges and lessons learnt, which have grouped into four areas :

1. **Low price of certified emission reductions and the decrease in the volume of validation and verification work.** For some DOEs this has led to difficulties in maintaining the accreditation in terms of the cost;
2. **Lack of opportunities to practice and implement** the updated CDM requirements due to the low volume of projects;
3. Experience with the CDM and current market conditions providing **opportunities to seek and support other business in the GHG sector.**
4. DOEs having **expectations of the market-based mechanism from Paris Agreement.**

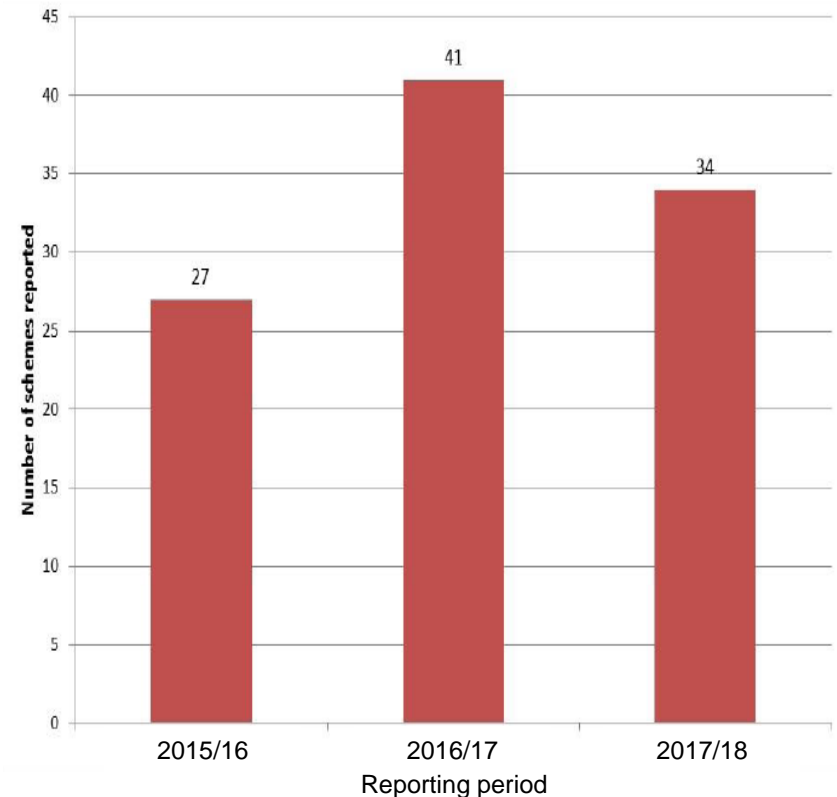

## Other business activities

28 DOEs reported other business activities that involve validation or verification of GHG assertions in schemes other than the CDM.
